RESEARCH FOR HEALTH IN CONFLICT MENA
Scaling up research capacity for health in conflict

ABOUT R4HC MENA

Research for Health in Conflict MENA (R4HC-MENA) is a four-year project under the Conflict Medicine Program and the Refugee Health Program. R4HC-MENA aims to build sustainable research capacity in the region to address major health challenges arising from conflict with a focus on Jordan, the Occupied Palestinian Territories, Lebanon and Turkey, as well as conflict-affected populations in the region.

WORKSTREAMS

R4HC-MENA work is focused on needs assessments in the first year followed by developing courses and trainings in the next three years across four workstreams at AUB GHI:

- **Capacity Building for Health in Conflict**
  
  Aims to build research capacity in core themes for conflict and health and incorporate conflict medicine in medical and health curricula.

- **Cancer in Conflict**
  
  Aims to build research capacity and cancer registries for cancer management in regions of conflict.

- **Mental Health**
  
  Aims to build research and resource capacity to improve mental health for refugee and host populations in Lebanon, Palestine, and the MENA.

- **Political Economy of Health in Conflict**
  
  Aims to provide systematic and empirically grounded research capacity building in the political economy of health in conflict in MENA.
