

Canadian OB/GYN and is currently the Gynecology Team Leader for MSF OCB South Beirut Project, Lebanon. This project is interdisciplinary and provides a comprehensive range of activities and services to Syrian refugees and other vulnerable populations including: primary care for children and adults with non-communicable diseases, childhood vaccinations, antenatal and postnatal care, basic emergency obstetrical and neonatal care, mental health services, health promotion education, community outreach, social work services, and sexual and gender based violence services.

She is also an instructor, trainer and editor for international courses aimed to improve maternal and newborn health outcomes with the Society of OB/GYN of Canada's global health program and the Canadian Network for International Surgery, in Haiti, Tanzania, and Malawi. During her time as consultant OB/GYN in Ottawa, Canada, she was involved in medical education for medical students and residents at the University of Ottawa and developed the first global women's health lecture for the medical school curriculum. She is also the co-founder of the OB/GYN International Surgery for Education and Research (OISTER) - University of Ottawa's first global women's health program.

Genevieve's passion for global sexual and reproductive health issues, in particular maternal and newborn health inequities, has led her to pursue a career in global public health. She is currently in her final year of her MPH from the London School of Hygiene and Tropical Medicine.
