

Richard Sullivan is Professor of Cancer and Global Health at Kings College London (KCL), and founding director of the Institute of Cancer Policy (ICP) and the Conflict & Health Research Group (CHRG) at KCL. He qualified in medicine and trained in surgery (urology), gaining his PhD from University College London.

Richard was clinical director of Cancer Research UK for nearly ten years leading the UK's clinical cancer research programming before moving in global health where he specialised in health systems in conflict and fragile settings leading a number of field missions for UN and other organisations in places such as Kosovo, Yemen, Eastern DR Congo and Afghanistan. His current research groups work on both global cancer policy and planning, as well as health systems strengthening for conflict & health. The ICP has a wide range of research programs from automated radiotherapy planning for low resource settings to use of virtual reality to augment pelvic gynae-oncology training. Likewise, the CHRG has been focused on the basic package of health services in Afghanistan, civil-military co-operation in health security, polio eradication and insecurity in Pakistan, and use of health intelligence in high security disease outbreaks. Richard has led, or been a member of, over 12 Lancet and Lancet Oncology Commissions and Series. Richard is an NCD advisor to the WHO, Save the Children CIVMIL group, National Cancer Grid of India as well as coordinator of the Research for Health in Conflict capacity program across the Middle East and North Africa (R4HC-MENA r4hc-mena.org).
